

# Public consultation on a new EU forest strategy

Fields marked with \* are mandatory.

## Introduction

---

The Commission's December 2019 [Communication on the European Green Deal](#) set out an ambitious vision of the EU becoming a sustainable, climate-neutral economy by 2050. It also announced that, building on the EU's 2030 biodiversity strategy, the Commission would prepare a new EU forest strategy covering the whole forest cycle and promoting the many services that forests provide. The key objectives of the strategy would be effective afforestation and forest preservation and restoration in the EU, to help increase the absorption of CO<sub>2</sub>, reduce the incidence and extent of forest fires and other risks, and promote the bioeconomy in ways that fully uphold ecological principles and are conducive to biodiversity.

The EU forest strategy will enable the forest sector to contribute to the new Commission priority of building a new growth model through the European Green Deal, including support for rural areas. Many EU policies are relevant to forests, so there is a need for a comprehensive strategy to ensure a consistent approach.

The strategy will also help the EU to meet its international commitments and will form the basis of a clearly established, consistent and holistic approach on forests, allowing stronger EU leadership internationally (in the context of the UN 2030 sustainability agenda, the Paris Agreement, the Convention on Biological Diversity and the Convention to Combat Desertification). The 2019 [Communication on Stepping up EU action to protect and restore the world's forests](#) established a framework for the EU's global action; this must be properly and consistently reflected in the formulation of domestic policies.

**Through this public consultation, we invite citizens and organisations to contribute to the preparation of the new EU forest strategy and share their views on potential objectives and actions.**

The consultation seeks stakeholders' input on challenges and opportunities as regards our forests, in particular in relation to the climate, biodiversity, rural areas and socio-economic welfare, disaster risk management, EU support instruments, forest-based industry, the EU's global leadership and its target of planting 3 billion trees by 2030.

The consultation will focus on EU territory, thereby complementing [the results of the Eurobarometer survey](#) on the current role and benefits of the EU's forests and the activities set out in the Communication on Stepping up EU action to protect and restore the world's forests.

Other public consultations are taking place in parallel on 'land use, land-use change and forestry — review of EU rules' and the new EU soil strategy.

## Guidance on the questionnaire

---

This consultation consists of some introductory questions as regards your profile, followed by a questionnaire in two parts. **Please note that you can choose to fill in only the first part and are not obliged to respond to all questions in the questionnaire.**

The first part of the questionnaire is aimed at gathering views and information from all citizens and organisations interested in the new forest strategy and European forests.

The second part also targets all citizens and organisations, but contains more detailed questions by area. This part is completely optional and you may choose not to answer it at all or only selected sections.

At the end of the questionnaire, you are invited to provide any additional comments, documents and position papers, expand on relevant issues not covered by the questions and give any general feedback you may have on the survey itself.

## About you

The Commission will publish all contributions to this public consultation. You can choose whether you would prefer to have your details published or to remain anonymous when your contribution is published. **For the purpose of transparency, the type of respondent (for example, 'business association', 'consumer association', 'EU citizen') country of origin, organisation name and size, and its transparency register number, are always published. Your e-mail address will never be published.** Opt in to select the privacy option that best suits you. Privacy options default based on the type of respondent selected

\* Please indicate the sector(s) in which you are active as an individual or an organisation:

*between 1 and 3 choices*

- agriculture and/or agricultural commodities
- biodiversity and/or environment
- climate change
- disaster risk management
- energy
- tree nursery
- forestry
- hunting
- forest-based industry
- other industry (e.g. construction)
- forest certification
- health
- tourism
- IT and digitalisation
- human and/or labour rights
- investment and finance
- media and communication
- urban/or other land planning and development

- other (please specify in the comments box below)

comments

### \* **Contribution publication privacy settings**

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

**Anonymous**

Only organisation details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published as received. Your name will not be published. Please do not include any personal data in the contribution itself if you want to remain anonymous.

**Public**

Organisation details and respondent details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published. Your name will also be published.

I agree with the [personal data protection provisions](#)

## PART 1

### Your views on potential objectives and actions of the new EU forest strategy

---

In its roadmap on the new EU forest strategy, the Commission set out a number of specific potential objectives and actions which the strategy could address. This section aims to obtain quantitative feedback on these objectives and actions, in order to determine public preferences and additional suggestions.

**Please rate the relative importance of the following objectives and actions for the new EU forest strategy:**

To nurture the forests that we have the new EU forest strategy should ...

	very important	important	slightly important	not important	I don't know
* ...enhance forest protection and restoration to meet the EU biodiversity and climate objectives, and reduce the loss of forest coverage, while strictly protecting all remaining EU primary and old-growth forests	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...preserve stocks and increase the EU carbon sinks in forests, their soils and harvested wood products	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...enhance prevention of disaster risk events and of damages, and secure forest resilience to incidence and extent of fires and other natural hazards, and secure forest health with a view to changing climatic conditions and environmental degradation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...support restoration of damaged areas and degraded ecosystems, taking into account projected climate conditions	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...ensure the sustainable management of all EU forests, maximising the provision of their multiple functions while enhancing their productive capacity	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## comments

There is no common definition of old-growth forests in the EU. The EU should not aim at defining old-growth forest, because one definition does not work in very different climates and vegetation zones. The strategy should rather require member states to form a definition by themselves or under the Forest Europe process.

To plan for the forests of the future, the new EU forest strategy should foster...

	very important	important	slightly important	not important	I don't know

* ...afforestation and tree planting by setting out a roadmap for planting at least three billion additional trees in the EU by 2030, as announced in the Biodiversity Strategy for 2030, in full respect of ecological principles, contributing to climate neutrality, the circular economy and biodiversity	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...adaptation of forests to climate change and strengthening their resilience to face future challenges, including through enhanced conservation and use of the genetic diversity of trees	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...new training, skills and jobs that reflects the multiple functions of forests	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...rural development, including local enterprises and value chains, tapping on forests' multiple functions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...innovative forest-based services and products with low environmental impact, replacing carbon-intensive counterparts	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...a strong research and innovation agenda to improve our knowledge of forests and to optimise their composition, structure, management and use, including for the bioeconomy	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## comments

Forests have an important role for energy systems in some Member States. Energy utilization directly as bioenergy from forestry residues and indirectly from industry sidestreams are important parts of wood use and can also support better forestry in the EU. Therefore, energy use should be an integrated part of the EU forest strategy.

To manage existing and new forests, it will be important for the new EU forest strategy to...

	very important	important	slightly important	not important	I don't know
* ...have a strong and inclusive governance framework engaging all relevant parties	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

* ...foster a stronger coordination between national forest policies and the European Green Deal's objectives	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
* ...improve and harmonise the monitoring of forests to demonstrate the effective contribution of sustainably managed forests to the EU objectives, and of the supply and demand of forest services	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...secure financing, including for research, enhancing the use of EU and national budget, as well as private funds, ensuring a consistent approach among different funding instruments (Common Agricultural Policy, Horizon Europe, Cohesion Policy Funds, LIFE, etc.)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...foster innovative financial incentives, including payments for ecosystem services and result-based schemes ('carbon farming') for forest managers that provide public goods such as carbon sequestration or biodiversity benefits, including through protecting and restoring forests	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...improve communication and dialogues on forests and their roles, considering the rural/urban interface	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
* ...ensure consistency with international commitments, reinforcing EU's international leadership (2030 sustainability agenda, Paris Agreement, Convention on Biological Diversity, and Convention to Combat Desertification, Sendai Framework for Disaster Risk reduction 2015-2030)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## comments

Forests are mainly national competence and the forest strategy should clearly reinstate this fact.

## PART 2

## THREATS AND CHALLENGES FOR EU FORESTS

Q1 Please rate the following threats and challenges for forests in Europe

	very important	important	slightly important	not important	I don't know
current levels of natural disasters and extreme events (e.g. forest fires, droughts, storms)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
projected risks for forests due to climate change (e.g. natural disasters and extreme events, and slow onset effects such as shifts in bioclimatic zones, precipitation, soil erosion)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
pests and diseases affecting trees	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
vulnerability of monospecific plantations and stands	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
loss of biodiversity and of high conservation value forests, and ecosystem degradation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
invasive alien species (invasive alien species' means a species introduced outside its natural range that might survive and subsequently reproduce, whose introduction or spread has been found to threaten or adversely impact biodiversity and related ecosystem services)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
forest loss (i.e. deforestation) and forest fragmentation due to infrastructure development, urbanisation, etc.	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
lack of, or poor, management planning failing to take account of all services that forests provide	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
unsustainable forest management practices (e.g. large-scale clear cuts, harvesting damage, soil compaction, excessive use of pesticides/herbicides)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
illegal logging	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

unbalanced local game populations, causing damage to forests	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
depopulation of rural areas and forest /land abandonment, leading to a lack of, or poor, forest management	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
lack of skilled workforce and relative unattractiveness of working in the forest (e.g. hard work, low income/revenues, limited investments opportunities)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
competing demands on forest resources and ecosystem services (e.g. increasing demands for wood and wood-based products, biodiversity protection, recreation, carbon sequestration, disaster risk reduction)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

### comments

Balanced supply and demand of wood keeps the health of forests at a good level, preserves the stock in forests and even increases carbon sinks.

## FORESTS FOR SOCIAL AND ECONOMIC WELFARE IN RURAL AREAS

Many people depend on forests for their livelihoods, and many forest owners/managers, rural communities and farmers get part of their income from forests.

**Q2** What should be done, in your opinion, to ensure that forests continue to provide rural communities with livelihoods and income?

	very important	important	slightly important	not important	I don't know
expand the economic and social opportunities that forests offer to rural communities	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
provide financial incentives for forest adaptation to climate change, and for strengthening forest resilience and carbon sequestration	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

provide financial incentives for forest biodiversity protection and forest restoration, e.g. payments for ecosystem services [e.g. water cleaning, floods and landslide protection, soil erosion control, cooling of cities]	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
support for post-disaster forest recovery	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote skilled jobs and better training for local populations	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
enhance advisory services and support for exchanges of good practice /knowledge and for lifelong learning	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
reward the communities that implement sustainable forest management and publicise successful stories (e.g. through logos, prizes...)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
support the local and sustainable sourcing of forest wood and non-wood raw materials (e.g. cork)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
expand opportunities for income creation through non-wood forest products and services [e.g. mushrooms, berries, games, cultural services focusing on leisure, health, recreation, education, spiritual well-being]	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
support innovative and local forest cooperatives, SMEs and industries (fostering access to markets and value chains with wood and non-wood added-value products and services)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
foster and promote cooperation and knowledge exchange among forest owners	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
support the digitalisation of forest management and use (including planning, implementation, monitoring and evaluation)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
invest in infrastructure to support sustainable forest management, disaster prevention and management, and forest protection, and exploit the economic and social opportunities of forests for rural areas	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

encourage dialogue between different stakeholders on forest issues	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## comments

Profitable forestry is the best incentive to ensure that forest owners (family forestry, commercial, state) take care of and grow more wood in their forests.

# FORESTS FOR CLIMATE AND BIODIVERSITY

---

While the EU's forests are very important for biodiversity conservation and mitigating climate change through carbon sequestration, climate change is also putting them under increasing pressure. They must be managed sustainably, improved in terms of both quality and quantity, and proactively adapted to projected climate change, in order to make an effective contribution to achieving the EU's climate and biodiversity objectives.

**Q3** What specific actions and measures should the EU forest strategy promote to enhance forest biodiversity, adapt forests to climate change, and strengthen carbon sequestration?

	very important	important	slightly important	not important	I don't know
increase the EU forest area through afforestation and reforestation taking into account ecological and climate change related aspects	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
help individual forest owners and managers to identify and manage their climate change related risks, including financial risks	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
restore damaged and degraded forests	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
increase the area of forests protected for biodiversity conservation and restoration	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
manage protected forests more effectively, so that they achieve their nature conservation objectives	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
increase the proportion of diverse, uneven-aged and mixed-species forests	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
enhance the genetic diversity of forests and trees	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

give preference to native tree species and provenances and/or species that are better suited to future climatic conditions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
protect forest soils and prevent soil degradation, in particular on carbon-rich soils [e.g. limit machinery use in harvesting operations, establish different skidding tracks, maintain forest cover on erosion-prone soils and run-off pathways, leave harvesting residues on site, avoid whole- tree harvesting]	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
increase the use of biodiversity-friendly forestry practices [e.g. increased deadwood, habitat trees, reduce the use of pesticides and fertilisers]	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote long-term wood products and uses, replacing more carbon- intensive materials [e.g. construction, renovation, consumer products]	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
take measures to align wood demand and consumption with forests' sustainable production capacity	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
provide foresters and other stakeholders with better advice, information, tools and applications for forest protection, restoration and adaptation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
improve forest monitoring at local level to improve the tracking of carbon stocks and biodiversity	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
boost research and innovation in best practices for enhancing carbon sequestration, adaptation and forest biodiversity	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## comments

Introducing new species from other areas also means new pests and forest damages caused by new invasive species. Increase of dead wood and other biodiversity-friendly practices must be based on market based certification and best practices in each country.

# EU/NATIONAL SUPPORT AND INSTRUMENTS

## Q4 What should be done to facilitate access to, and improve the use of, EU and national funds for forest management and forest-related activities?

e.g. agriculture and rural development, research, LIFE, cohesion and regional development policy, Invest EU, Recovery and Resilience Facility, Union Civil Protection Mechanism Grants etc.

	very important	important	slightly important	not important	I don't know
reduce administrative burden and relax the conditions for accessing funds	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote funding opportunities more proactively in order to raise awareness	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
help local and regional actors with their funding applications	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
national or regional authorities should prioritise forests in budget allocation and expenditure in rural development programmes, cohesion policy funding, Invest EU, etc.	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
make sure that funding options match the needs of forests and the forest sector, and allow these to be addressed locally	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
raise the EU co-funding rates for forest projects and measures	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
introduce more possibilities for Member States to use State aid for forestry	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
develop new financial instruments for forests	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

### comments

Forestry is a normal commercial activity. Political interventions should not cause undue market distortions.

## FOREST-RELATED CHALLENGES FACING FOREST-BASED INDUSTRIES

**Q5 What are the main forest-related challenges facing the forest-based industry sector in your country and/or the EU today?**

	very challenging	challenging	slightly challenging	not challenging	I don't know
lack of skilled labour force	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
unclear forest policy objectives and regulatory framework	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
uncertain availability of wood resources	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
competition between bioenergy and other wood uses for biomass	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
lack of information on effective standards guaranteeing sustainable sourcing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
lack of price premium for sustainable products	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
matching of value chains' needs to available forest resources in the EU [e.g. small properties; irregular supplies; diversity of species, qualities and dimensions; diverse stands; proliferation of hardwoods in some countries]	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
lack of clear, comparable and comprehensive information on the state of EU forest resources and current trends	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**comments**

The uncertainty caused by poor implementation of the RED 2 Directive and further exacerbated by the lack of guidance, the taxonomy, and the revision of RED 2 are problems for investors and forest owners and do no offer long term stability for activities.

**PROMOTION OF WOOD PRODUCTS**

---

**Q6 What could be done to promote the wider use of sustainable wood-based products and boost their recycling rates?**

---

	very important	important	slightly important	not important	I don't know
support consumer choices by providing better information on the environmental footprint of wood products compared to non-wood alternatives	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
improve the exchange of best practices and promote training on sustainable uses of wood products (e.g. for architects)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
support research on new and innovative wood-based products	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
improve communication methods and demonstrate sustainable forest management in the provision of raw materials for wood-based products	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
quantify the economic value of the contribution of wood to carbon sequestration, e.g. through carbon removal certificates	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote the use of local and sustainable wood products in public contracts	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote investment in improved designs of wood-based products that allow easier recycling and re-use	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
incentivise the use of recycled material in wood-based products	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote sustainable wood products by changing the rules on accounting for their carbon storage capacity in national climate targets	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

comments

## CERTIFICATION AND LABELLING

---

There are several certification schemes and labelling schemes in the EU for the forest-based products. We would like to gauge how well-known they are and how useful they are in supporting consumer or business decisions.

[e.g. certification schemes FSC, PEFC and labelling schemes EU ecolabels and Eco-Management and Audit Scheme]

Q7 To what extent do you know of/use tools that certify the sustainability of forest products (forest certification, product labelling)?

*at most 1 choice(s)*

- I don't know of any labelling or certifying systems for forest-based products
- I do not trust the existing labelling and certification systems and I would like that the EU does something about it
- I always buy certified wood-based products with labels demonstrating they come from sustainable sources
- I buy labelled/certified products if there is not a significant price difference vis-à-vis non-certified products
- certification/labelling is sometimes an important criterion driving my decision to buy a product
- In my purchasing decisions, I am more likely to trust certified products from EU forests

## FOREST INFORMATION AND MONITORING AT EU LEVEL

---

In view of the multiple services that forests provide, the numerous sectors that rely on forests and the threats to forests that are exacerbated by climate change, the 2030 biodiversity strategy refers to 'the need for a better picture of the health of European forests'. In this regard, there are plans to develop the [Forest Information System for Europe \(FISE\)](#).

Q 8 What should be done to improve forest data, knowledge and monitoring of EU forests?

	very important	important	slightly important	not important	I don't know
improve the Forest Information System for Europe (FISE) so that it becomes an EU forest monitoring system that integrates climate, biodiversity, resilience and risks, economic and social data	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
assess forests' climate risks and vulnerabilities	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

improve and harmonise the monitoring of condition, pests and diseases, and other forest –related risks	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
improve the monitoring of forest biomass	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
improve the monitoring of forest biodiversity, including genetic diversity, and the availability of spatial analyses (e.g. maps of deadwood levels, maps of protected forest habitats)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
produce regular short analyses on key subjects (e.g. resilience of specific types of tree, results of key scientific articles, use of forest biomass resources)	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
prepare more in-depth assessments of forest ecosystem services	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
make better use of <a href="#">Copernicus data</a> to monitor EU forests (e.g. by diversifying and making more regular forest products available)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
further work on the harmonisation of national forest inventories	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
facilitate the integration of remote-sensing data with forest inventories and other field assessments	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
improve the governance of FISE and involve Member State experts and other stakeholders in future developments	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## comments

Monitoring of forests at a European level is important, but it is even more important to improve monitoring at national level since the level of monitoring is very heterogeneous in different Member States. Europe has many vegetation zones with very specific and special characteristics.

## ENSURING CONSISTENCY WITH INTERNATIONAL AGREEMENTS AND SHOWING GLOBAL LEADERSHIP

---

The future forest strategy will help the EU to meet its international commitments and will form the basis of a clearly established, consistent and holistic approach on forests, allowing stronger EU leadership internationally (in the context of the 2030 sustainability agenda, the Paris Agreement, the Convention on

Biological Diversity and the Convention to Combat Desertification). The 2019 Communication on Stepping up EU action to protect and restore the world’s forests (2019) established a framework for the EU’s global action; this must be properly and consistently reflected in the formulation of domestic policies.

**Q 9** In order to ensure consistency with international commitments and to support the EU’s international leadership, the new EU forest strategy should ...

	very important	important	slightly important	not important	I don't know
in relevant fora, set out the EU's positions, approaches and values in favour of sustainable forest management worldwide	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote experience and lessons learnt at EU level	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ensure consistency between the EU's domestic policies and trade agreements	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ensure consistency between EU development/international cooperation and the EU's neighbourhood policy	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
strengthen international cooperation to implement the UN 2017-2030 strategic plan for forests	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

## PLANTING AT LEAST 3 BILLION ADDITIONAL TREES IN THE EU BY 2030

---

Trees are the source of multiple benefits – providing clean air, absorbing CO2 from the atmosphere, providing habitats and supporting our economy, livelihoods and physical and mental well-being. The new forest strategy will include a roadmap for planting at least 3 billion additional trees in the EU by 2030.

**Q 10** Where should the 3 billion+ additional trees be planted?

*at most 4 choice(s)*

- afforestation of productive agricultural land
- afforestation of degraded land

[e.g. areas subject to erosion and landslides; areas at risk of desertification;

areas deforested and/or overused in the past; contaminated industrial or mining sites; other degraded land]

- tree planting in upper water catchments to delay and reduce downstream flooding
- tree planting on grasslands (except for high nature-value grasslands)
- tree planting in (peri-)urban areas
- tree planting for agroforestry, including orchards
- tree planting as landscape features to foster connectivity (hedges, rows of trees, copses, etc.)
- tree planting along infrastructure corridors (roads, waterways...)
- tree planting as part of forest restoration
- other (please specify in the comments box below)

comments

Afforestation of old peat production areas and non-productive land with no biodiversity values.

Q 11 What are the main challenges in planting additional trees in your country?

	very challenging	challenging	slightly challenging	not challenging	I don't know
finding appropriate spaces in urban and peri-urban areas	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
finding appropriate spaces in rural areas	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
capacity of tree nurseries to produce and provide the required materials	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
lack of skilled workforce	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
lack of administrative and support /advisory services	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
ensuring plant health and genetic diversity in nurseries	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
forecasting future climate conditions and matching tree species/genotypes	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
barriers to the transnational production and transfer of forest	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

reproductive material (in particular for climate change adaptation)					
financial resources for planting and maintenance in (peri-)urban areas	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
financial resources for planting and maintenance in rural areas	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
loss of farmland value after conversion to forest land (i.e. opportunity costs)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
local acceptance and/or administrative procedures	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
ensuring that land remains planted with trees for a long period	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
unfavourable climatic conditions (e.g. water scarcity)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

comments

Q 12 How could the EU encourage the wider use of forests for the health and well-being of all?

	very important	important	slightly important	not important	I don't know
encourage greater uptake of funds for activities promoting health and well-being (e.g. eco-tourism, improved access to urban and peri-urban forests, recreation, etc.)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
raise awareness of the health benefits of forests	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
promote more research on forests and associated health benefits	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
encourage forest-related educational opportunities	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

promote the exchange of best practices and other communication efforts on the multiple roles of forests	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
facilitate public access to all types of forests	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
other (please specify in the comments box below)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

comments

Q13 Increasingly, consumers can compensate for the CO2 emissions associated with their purchases (e.g. flights, concerts, etc.) by paying a supplement that will be used by a private undertaking to plant trees in the EU or elsewhere. Have you ever done this?

only one answer allowed

- Yes, I have often compensated some of my greenhouse gas (GHG) impacts with tree planting schemes
- Yes, I have occasionally compensated some of my GHG impacts with tree planting schemes
- No, but I'm considering it
- No, because I don't believe that the trees will be planted
- No, because I don't believe that the trees will be monitored over a sufficiently long period
- No, I haven't

comments

This is a somewhat weird question in this consultation... what is the point?

## ADDITIONAL FEEDBACK

---

Should you wish to provide additional information (e.g. a position paper) or raise specific points not covered by the questionnaire, you can upload additional documents here.

Please note that any uploaded documents will be published alongside your response to the questionnaire, which is the main input to this consultation. The document is optional and serves as additional background to help us understand your position.
